SUMMARY

Senior Manager, Client Sales & Insights with 4+ years of experience building ML, NLP, and GenAI solutions across CPG, retail, and e-commerce. Delivered automation and analytics systems that reduced manual workflows from days to hours, improved classification accuracy to 95%+, and enabled faster business decision-making across market structure, pricing, and product intelligence use cases. Strong experience in problem framing, model development, stakeholder management, and deploying scalable solutions that bridge business, operations, and data science.

SKILLS

- **Languages:** Python, SQL(MySQL and Redshift), Bash, R
- **ML/NLP:** scikit-learn, Pandas, NumPy, SciPy, Statsmodels, TensorFlow, spaCy, NLTK, Sentence Transformers, FAISS, Optuna
- **Tools:** Git, AWS(EC2, S3), Sagemaker, MLOps
- **Techniques:** Classification, Regression, Clustering, NLP, LLM Workflows, Forecasting, Feature Engineering, Experimentation, Random Forest, Decision Trees, Deep Learning
- **Soft Skills:** Stakeholder Management, Business Communication, Problem Solving, Cross-functional Collaboration, Leadership & Ownership, Adaptability

PROFESSIONAL EXPERIENCE

Circana India Pvt Ltd | Bengaluru, IN (Remote)

Jun '24 - Present

Senior Manager, Client Sales & Insights

Driving innovation analytics for CPG/retail by building NLP/ML products for DCS, private label and new launches, and guiding cross-functional teams through implementation.

- Built an ML-powered product classification engine for MDM checks, reducing processing time from **4 days to 1 day** with **95%+ accuracy** across thousands of products in **50+ categories**.
- Engineered an automated item placement methodology using TF-IDF, Optuna, and Multinomial Naive Bayes, cutting a critical manual workflow from **3 days to 0.5 days**.
- Architected Sentence-Transformer models to detect private-label knockoffs and classify product launch types such as **New to Market** vs **New to Brand**, enabling scalable competitive intelligence.
- Developed a Microsoft Copilot Studio-based DCS Analysis Copilot that enabled stakeholders to generate structured **PowerPoint reports** with **DCS definitions, comparisons, brand shares, and premium/mainstream insights**, reducing repeated dependency on the **Operations team**.
- Developed regression-based frameworks to rank product attributes by **sales impact**, helping clients identify key **product-development** and **portfolio-strategy drivers**.

BeepKart | Bengaluru, IN

Nov '22 - Jun '24

Data Analyst/Data Scientist

Developed and implemented machine learning models to optimize processes and enhance decision-making across sales, procurement, and marketing, significantly boosting key performance indicators and efficiency.

- Built **pricing and cost prediction models** for used two-wheelers (refurbishment cost, procurement price, sales price), increasing average gross margin per bike from **₹6k to ₹14k** and improving supply-demand

efficiency by **77%**.

- Designed **lead prioritization and PI location optimisation** models (logistic/ML + clustering), raising same-day inspections to **23%**, increasing daily inspections from **3.4 to 4.2**, and lifting same-day conversions from **18% to 21%**.
- Developed **parts identification and cost analytics** (clustering + statistical analysis), reducing misidentification costs by **9%** and improving conversion rates from **23% to 30%**.
- Automated **reporting and marketing funnel tracking** using Python, SQL, Tableau and Google Sheets, improving campaign visibility and contributing to a **6% improvement in marketing ROI**.

Tiger Analytics | Bengaluru, IN

Mar '22 - Nov '22

Analyst - Data Science

Developed and applied machine learning models, including a linear model for retail sales prediction, driving significant profit optimizations and contributing to client revenue growth through data-driven insights.

- **Baseline Sales Prediction for a US Retailer:** Developed a linear model with data engineering and machine learning, optimizing the retailer's product distribution for maximized profit.
- Utilized decision trees, logistic regression, and hypothesis testing to enhance sales forecasting success.
- Worked closely with cross-functional teams to deliver data-driven insights and recommendations, directly contributing to client revenue growth through optimized business operations.

Accenture Solutions Pvt Ltd | Kolkata, IN

Jul '21 - Mar '22

Associate Software Engineer

Leveraged SAP BODS ETL and ABAP programming to enhance data precision and operational efficiency in aviation client data integration and inventory management.

- **Aviation Client Data Integration with SAP BODS:** Streamlined aviation client data integration, improving data precision and workflow efficiency.
- Enhanced data quality and operational efficiency through expert use of SAP BODS ETL and ABAP programming in inventory management.

EDUCATION

Liverpool John Moores University | Bengaluru, IN

Dec '21 - Apr '24

Master of Science in Machine Learning and Artificial Intelligence (Part Time)

- Conducted in-depth research on contextual question answering systems using BERT and its variants, demonstrating advanced applications in natural language processing and machine learning.

School of Engineering and Technology, Jain University | Bengaluru, IN

Aug '17 - Jun '21

Bachelors in Technology (Hons) Computer Science with Specialization in Data Science

- Python, SQL, Statistics, Linear Regression, Machine Learning, Deep Learning, NLP, Reinforcement Learning
- **Secured 83.4%**
